Abstract

This paper builds on published research regarding psi-lines. Quantitative experiments that are detailed here, demonstrate that psi-lines and the mind are intrinsically connected to the Golden Ratio (1.6180). As this is a universal constant, the conclusion strongly suggests that mind created psi-lines are connected to the structure of the universe.

Key Words

Mind, intent, psi-lines, subtle energies, structure of the universe, the Golden Ratio

Introduction

This paper builds on published research regarding psi-lines ¹, which is referenced at the end of this paper. These findings suggest that psi-lines have a minimum length ³, and that there is a connection between psi-line length and width ². This paper further explores these factors.

Since ancient times, psi-lines have been perceived and used (e.g. for tracking and navigation⁴), and are even created by animals and birds to assist in their migrations. Psi-lines can be permanent and our ancestors ¹⁰ have left numerous examples around the world ⁹.

Experimental Protocol

Prior to experiments, checks were made that no existing subtle energy lines existed in the vicinity that could interfere with the experiments. Existing lines were deleted by the mind's intent.

Length mm	Width mm	Ratio	Date
780	435	1.793	31/12/2016
800	500	1.600	31/12/2016
696	425	1.638	01/01/2017
680	400	1.700	01/01/2017
570	400	1.425	02/01/2017
900	610	1.475	05/01/2017
898	599	1.499	05/01/2017
600	465	1.290	29/06/2017
600	410	1.463	29/06/2017
915	585	1.564	21/07/2017
910	432	2.106	21/07/2017
882	418	2.110	21/07/2017
628	422	1.488	21/07/2017
538	327	1.645	27/07/2017
880	600	1.467	28/07/2017

Table 1

As measurements of subtle energies and psi-lines are affected by many factors including the rotation of the Earth ⁸ and the Earth's orbit round the Sun ^{7, 6}, it is preferable to collect data over long periods of time. Over a period of several months, psi-lines were created with the

intent that their lengths and widths would be as short as possible. After creation, the width and length of the psi-line was visualised as are being squeezed, to ensure minimised dimensions. Table 1 gives the dimensions that were measured together with the ratio of their length over width.

Findings

As mentioned above, the measurements for mind created psi-lines have a variable consistency. Table 2 quantifies this variability and shows that the average of these readings had a variance of 3.2%. However, the important figure is the average ratio of 1.6177.

Average		
Length mm	Width mm	Ratio
752	469	1.6177
Ave Variation		0.051
% Variance		3.2%

Table 2

Table 3 sets out, for the length/width ratio, the variance from the Golden Ratio ⁵. As is apparent, the average ratio for these measurements equals the Golden Ratio within a 0.02% variance: A remarkably accurate result.

1.6180	Golden Ratio ϕ
0.0004	Difference from Ratio
0.02%	% Variance

Table 3

Conclusions

It cannot be a coincidence that, to a very high degree of accuracy, the ratio of the shortest to the narrowest psi-lines equals the golden ratio, (a fundamental universal constant of 1.6180). This result strongly suggests that, once again, the mind, consciousness, and psi-lines are intimately connected to the structure of the universe.
